#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Note reference characters "10" and "20" used throughout the specification.
2. The drawings are objected to because the following reference characters are not labeled in an appropriate descriptive manner: Reference characters in Figure 1 need to be labeled to describe the element each reference character represents.
3. Applicant is required to submit a proposed drawing correction of the above noted deficiencies in reply to this Office action. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

### ***Specification***

4. The disclosure is objected to because of the following informalities:
  - a. The use of "it fails to provides" on line 13 of page 1 is grammatically incorrect. It is suggested that this phrase be changed to -- it fails to provide --.

Art Unit: 2173

b. The use of "functions by pressing or touch the multifunctional keys" on line 21 of page 5 is grammatically incorrect. It is suggested that this phrase to be changed to -- functions by pressing or touching the multifunctional keys --.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Haynes et al. U.S. Patent 6,177,941.

Referring to claim 1, Haynes et al. teach a method comprising the keyboard detects if any activation unit is pressed, the microprocessor of the keyboard then sends a corresponding

function signal to the host device, the host device then opens a corresponding multi-option function-selection pull-down manual, the multi-option function-selection pull-down manual is then displayed on the screen, users then select specific functions, and the host device executes the selected function (users, using either a keyboard or a pointing device, activate a pull down menu containing multiple options for user selection, upon which the option is performed; for example, as seen in Figure 4, when the user selects the "Edit" feature, by activating it from a keyboard for example, a pull down menu containing function options such as "Undo", "Cut", "Copy", etc. is displayed on the screen; the functions of the pull down menu can then be selected while the pull down menu is displayed, performing the corresponding operation of the function, such as undoing the last action) (column 1, lines 60-67 through column 2, lines 1-9).

6. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. § 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach similar methods of displaying pull-down menus containing multiple options for user selection.
